

Wencheng Xue

Cincinnati, Ohio | (513)-888-3394 | xuewencheng156@gmail.com | <https://www.linkedin.com/in/wencheng-xue-5aa52631b/>

SUMMARY (optional)

Cybersecurity student specializing in host and internal network security testing, with a focus on Active Directory exploitation, privilege escalation, and post-exploitation techniques. Experienced in identifying high-impact vulnerabilities and delivering clear, reproducible findings across systems, applications, and APIs.

EDUCATION

University of Cincinnati, Cincinnati, Ohio

May 2031

Lakota West High School, West Chester, Ohio

May 2026

PROFESSIONAL EXPERIENCE

HackerOne, Bug Bounty Hunter, Cincinnati, Ohio (Remote), August 2024 - Present

- Identified and disclosed vulnerabilities to organizations including **Nextcloud**, **GitLab**, **Epic Games**, and **Vercel**.
- Conducted source code review, binary analysis, and live application testing to uncover high-impact vulnerabilities across multiple attack surfaces.
- Leveraged tools including **Kali Linux**, **Burp Suite**, **Caido**, **Ghidra**, **APKTool**, and **Nmap** to perform static and dynamic analysis of applications and systems.

Google Bug Hunters, Cincinnati, Ohio (Remote), April 2026 - Present

- Identified and disclosed vulnerabilities through Google's Open-Source Software (OSS) vulnerability disclosure program
- Performed in-depth source code analysis to uncover supply chain vulnerabilities, including issues that could lead to remote code execution (RCE)

Leadership Initiatives, Cybersecurity Intern, Washington D.C., June 2024

- Conducted security assessments to identify risks and vulnerabilities in non-profit organizations
- Designed and proposed secure data storage solutions to strengthen data protection and reduce organizational risk

CERTIFICATIONS

- Offensive Security Certified Expert (OSCE3)
- Offensive Security Web Expert (OSWE)
- Offensive Security Experienced Penetration Tester (OSEP)
- Offensive Security Exploit Developer (OSED)
- CompTIA PenTest+

SKILLS

- **Host & Internal Network Security Testing:** Windows/Linux systems, service exploitation, local privilege escalation
- **Source Code & Binary Analysis:** Static analysis, reverse engineering, vulnerability discovery, supply chain analysis
- **Scripting & Automation:** Python, PowerShell, Bash
- **Programming:** Python, C, C#, C++
